

Tango

Third-generation walker

The Tango is a cross-folding walker and our most exclusive model. It stands upright and takes up very little space when folded. Tango is thus very easy to store and transport.

The Tango stands upright when folded

The Tango is the safest walker on the market thanks to our patented Etac Braking System™, where the braking mechanism is protected in the tube. There are no cables to catch or tangle, and even after several years of use the same small amount of effort is required to brake the Tango walker. The brakes are automatically adjusted when the height of the walker is adjusted.

Description

Tango incl. basket	15050102-14
Tango incl. basket, tray and back rest	15050108-14

Item no.

Dimensions	Total width:	60 cm
