

A functional comfort wheelchair

The Panther makes getting around easy. The comfort of the seat is optimized and provides the possibilities of being active or resting.

Flexibility

The Panther is available in four different sizes. A wide range of seating positions makes it possible to adjust the chair while it is still easy to fold and transport. The Panther is flexible and can be perfectly adapted to meet the individual requirements of each child.

Ergonomically correct

When adjusting the back angle, the pivoting point of the seat is through the hip joint. This ensures that the user always will have the same head and body support, even when the seat back is reclined.

The Panther is a solid and flexible comfort wheelchair. The construction of the chair is designed to provide the child with the optimum seating position - and with that also the best well-being. With the Panther the child is ready for experiences.

Accessories

A wide range of accessories ensure the correct support for every child.
