

NEW!

Towel-Matic II® Automatic Paper Towel Dispenser

Designed for Counter-top, Wall or under Cabinet Mount

Guarantee satisfaction or money back!

All new 2nd generation Towel-Matic®II automatic paper towel dispenser has extended scanning panel that tightly grabs on to towel that ensures effortless towel tearing and guarantees the rolls never unravel. This best automatic sensor perforated paper towel dispenser works on all home perforated paper towel brands. It prevents contamination of germs and unraveling of towels.

How it works:

Towel-Matic® II has a built-in optical scanner that identifies the perforations on the paper towel and stops right at the perforated line every time making tearing towel sheets easy and mess free. It is easy to pre-set any brand and dispensing length desired. It is powered by 4 C size batteries that can last up to one year or 100 rolls of standard 80-sheet towels. Optional AC adaptor is available. It is designed for table top, wall mount or under cabinet mount. Brackets sold separately.

Why bother?

Since none of the paper towel holder on the market can actually grab the paper towel for you, it causes unraveling of towels; and has to touch the unused towel roll that costs money and touching unused towel is unhygienic.
